

ENERGY SAVINGS GUIDE

DID YOU KNOW THAT...

TiLos' population TRIPLES during SUMMER months?

Here's 5 ways you can help
in reducing unnecessary consumption:

By taking a shower instead of filling the tub you consume 3 times less energy

Adjust the air-conditioner's thermostat at 26-28°C

Always remember to turn off lights and air-conditioning when leaving your hotel room

Fridges can be the most electricity guzzling appliances. Ask your hotel manager to place them away from heat sources (such as ovens or direct sunlight)

A ceiling fan consumes 1/10 of the energy an air-conditioner does. Go for it!
